## Cobra Skin Exhaust Wrap

Cobra Skin wrap uses our new HPTC coating, allowing it to sustain 1350°F continuously. In addition to increased temperature parameters, it also allows the wrap to remain flexible and strong. For most header wraps the fiberglass will become weak and brittle at 1000°F, coatings will extend the base temp to 1200°F, but the fibers will still become brittle. With our new coating, not only does it give the fiberglass a higher rated temperature of 1350°F, but it allows the fibers to remain flexible. Flexible fibers will expand and contract with the metal of the exhaust system, ensuring long term maximum heat retention and a longer life! The coating also gives our wraps an increased abrasion resistance even at 1350°F and results in less fraying when cutting, installing, fewer loose fibers, and less itch. The black HPTC is deep black and it stays deep black after it has been heat cycled.

Cobra Skin exhaust wrap features a special weave making it easier to wrap around bends in pipes compared to conventional exhaust wraps. The special weave also gives this exhaust wrap a carbon fiber look after it has been installed! Exhaust heat wraps maintain more heat in the exhaust system, exhaust gases become hotter, allowing the exhaust gas to exit the system faster! This increases exhaust scavenging pulling intake with exhaust gases through the system faster, lowers intake temperatures: that equals more horsepower. Cobra Skin wrap also reduces radiant heat damage and can lower under hood temperatures by as much as 50%. Lower ambient under hood temperatures can lead to even lower intake temperatures. Cobra Skin exhaust heat wrap can withstand a real world rating 1350°F continuous and 2000°F intermittent.

Our exhaust wrap is asbestos free and is made from a base high quality fiberglass yarn. Cobra Skin wrap is noncombustible. It is also water and fungus resistant. Always wear safety glasses, dust mask, and gloves. Long sleeves are recommended when handling this wrap.

### Features:

- Withstands 1350°F continuous, 2000°F intermittent
- Special weave makes it easier to wrap around bends,
- Has a carbon fiber look
- Reduces under hood temperatures up to 50%
- All rolls are 1/16" thick
- Made in USA

### Uses:

- Exhaust pipe
- Headers
- Mufflers
- Catalytic converters

Part #	Description
380008	Black 1" x 25' Roll
380009	Black 1" x 50' Roll
380011	Black 2" x 15' Roll
380012	Black 2" x 25' Roll
380013	Black 2" x 50' Roll
380015	Black 2" x 100' Roll
