Section 1: Applications

Applications: radiator hoses, hydraulic hoses, fuel lines, wiring.

Industries Served
- Automotive
- Marine
- Heavy Duty
- Power Generation
- Appliance
- Fire Protection
- Foundries
- Marine
- Petrochemical

Section 2: Features and Benefits

HP Hose Sleeve can be used to both retain and dissipate radiant heat. When used in numerous automotive applications on upper radiator hose, it can help lower air intake temperatures. This can result in more power and greater fuel mileage. In other applications it can be used to shield fuel lines reducing the risk of cavitation. It can also prolong the life of hydraulic lines and increase their life.

Section 3: Technical Data

Temperature Parameters:
- Base Fabric Service: 1200°F
- Max Fabric Service: 2000°F <30 sec

Physical Characteristics
- Fiber content: Texturized E-Glass
- Weave: Plain
- Thickness: 0.032" (+/- 10%)
- Max roll length: 100’
- Treatment: HT
- Color: Off White / Tan
- Electrical: Non Conductive

Meets Coast Guard Spec. 164.009 for Incombustible Materials
